Shrubs

BUFFALOBERRY: Medium to tall shrub; drought resistant and tolerant of alkaline soils; good wildlife.

CARAGANA: Medium to tall, best on sandy to loamy soils.

COTONEASTER: Medium shrub.

GOLDEN CURRANT: Small to medium shrub, fair drought and alkali tolerance, shade tolerant, good cover for birds and small mammals.

LILAC: Tall, one of the better shrubs for windbreak purposes.

MOUNTAIN MAHOGANY: Medium shrub, tolerates alkaline, needs well drained soil.

N.M. FORESTERIA (privet): Very tall, does well on moist soil. Good wildlife cover.

NANKING CHERRY: Medium and hardy, on most soils statewide. Fruit edible and relished by wildlife.

PLUMS: Tall shrub or short tree. Does well on most soils (excluding alkali).

RED-OSIER DOGWOOD: Small to medium shrub. Not suited for dense clays.

SAGE: Medium shrub, does well on droughty and poor soils. Good erosion control species.

SAND CHERRY: Short shrub, best on sandy to loamy soils.

SUMAC: Small to medium, excellent alkaline tolerance.

WOODS ROSE: Low shrub; grows well on most soils; good wildlife species.

Trees

ASPEN: Tall tree; poor drought resistance.

GAMBEL OAK: Small tree best used in mass plantings, alkaline tolerant, good wind resistance.

COYOTE WILLOW: Medium height, requires moist soil; good wildlife value.

COTTONWOOD, HYBRID (Cottonless): Tall, fast growing plant in moist soils or in areas with supplement water.

COTTONWOOD, FREMONT: prefers riparian, has cotton

COTTONWOOD, NARROWLEAF: Rapid growth rate excellent cold hardiness.

GOLDEN WILLOW: Medium to tall, same as cottonless cottonwood.

GREEN ASH: Medium to tall, on most soils.

HACKBERRY: Tall tree, grows well in most soils.

HONEY LOCUST: Medium to tall, on soils in the plains.

LOMBARDY POPLAR: Medium to tall columnar tree, need permanent sub-irrigation, not recommended as a component row species in windbreak.

NATIVE WILLOW: Tall, good for riparian areas.

PEACHLEAF WILLOW: Small to medium, tolerates alkaline soils.

PRAIRIE SKY POPLAR: Rapid growth rate, cottonwood cross.

SIBERIAN ELM: Tall and drought resistant, on most soils statewide.

Conifer Trees

AUSTRIAN PINE: Tall, on most soils of low pH, a good windbreak tree.

BRISTLECONE PINE: Tall, slow growth rate,

COLORADO BLUE SPRUCE: Tall, on moist soils but will grow on drier sites if watered for establishment.

DOUGLAS FIR: Tall, on east and north slopes above 6,000 feet.

EASTERN RED CEDAR: Medium, on most soils in the plains; drought resistant when established, good windbreak species.

ENGELMANN SPRUCE: Tall tree; requires shade.

LIMBER PINE: Medium, drought resistant.

LODGEPOLE PINE: Tall, on most soils above 6,000 feet.

PINION PINE: Medium tree, grows well on arid, droughty sites when established.

PONDEROSA PINE: Tall, on most soils of low pH except heavy clay. One of the better windbreak trees.

ROCKY MT. JUNIPER: Medium tree; does well on most soils; drought resistant when established; excellent windbreak species.

SCOTCH PINE: Tall, on most soils of low pH, not advisable for windbreaks because of brittleness. Not winter hardy at maturity; good Christmas tree.

WHITE FIR: Tall tree; grows best on east and north slopes; good Christmas tree species.
